

DAGGA PARTY
Municipal Elections 2021
A Synopsis of Policy Standpoints

1. The Dagga Party promotes the **legalisation of Cannabis for poverty alleviation** and believes **municipalities should be able to self regulate regarding Cannabis, Covid and other issues.**
2. We will motivate that Cape Town (and Knysna, Oudtshoorn, Plettenberg Bay) be declared a **Section 235 Municipal Cannabis Homeland** by a motion in Council.
3. We will implement **Municipal Energy Projects** (biogas from sewerage, solar, wind) to get off ESKOM load-shedding.
4. The Dagga Party **opposes a mandatory Covid vaccine and vaccination 'dompas'** for access to services as an infringement on Constitutional rights.
5. We will promote **health and first aid against Covid**, and entirely **oppose the mandatory vaccine, lockdowns and medical apartheid** in Dagga Party municipalities.
6. We will address homelessness by the establishment of **regulated, safe mini-home parks**, with developmental support and security of tenure. .

7. We will boost resources for job creation by the **MASS CULTIVATION of Cannabis** for industrial purposes using grey water **at all municipal sewerage works** for manufacture of value added products by local citizens. .
8. We will prevent tender corruption by only allowing **locals to tender for local projects.**
9. We believe genuine **development and education of people** is more effective in the long term than surveillance and policing, and we recognise the need to offer **development opportunities and leadership coaching to Youth.**
10. We will promote and **enable urban agriculture and biodiversity initiatives** in all municipalities.
11. People who vote for mainstream parties are wasting their vote. Look around, and see that nothing changed, but only got worse. Mainstream political parties do not offer **Cannabis as a beneficial resource for development** to the public,
12. Only the Dagga Party promises an **equitable. sustainable growth economy** through the **immediate legalisation of Cannabis** in Dagga Party municipalities.
