<b>Brief bio:</b> Studied journalism and social anthropology at UCT. Have a deep interest in the being of society's members and the environment. I have been in and out of Obs for the past 10 years.	
<b>Motivation for standing:</b> I like to find and create solutions to ineffective systems. I would like to play a part in creating a more inclusive Obs that prioritizes climate change needs with social upliftment efforts while simultaneously adhering to the needs and community feeling of all obs residents, informal and formal alike.  I have observed the issues of Obs from the sidelines for years and felt quite confused and overwhelmed by the lack of information that is readily accessible to the public. Many Obs residents do not know about the civic association or feeding schemes or other projects going on because we live in a world that creates separation and disjuncture communication. That, teamed with anti-social behavior and awkward guilt avoiding disappearances of our neighbors, and we've got a mix of very ineffective engagements with our community that lead to further disjunctures as opposed to bringing our community together. I'd like to try help assist in bridging the gap that exists by finding ways to make community engagement interesting to everyone so we can start getting somewhere with our stagnating neighborhood.
