Dear colleagues

## **Appreciation for community access to SARS CoV2 vaccines**

We would like to thank you and your staff for making SARS CoV2 vaccines available to the community, especially as the GSH / UCT Community of Hope vaccine centre options were no longer open.

It was great to have appointment times, as well as an easily accessible, well-ventilated room near reception as the vaccine centre.

Kawthar van Nelson as the clerk was welcoming and careful to make sure all details were correct.

We would also like to appreciate the nursing staff who came down from the wards to administer vaccines.

We thought you would like to hear some of the comments made by members of the community who made use of the service:

I was a walk-in. I was met with kindness, efficiency and caring. What a pleasant reception. Thanks to all for allowing us locals to be vaccinated at Mowbray Maternity.

My mom and I got our boosters there. The ladies who helped us were super nice and it was quick and painless! Very grateful to have been able to go there. Thank you Mowbray Maternity.

I had a booster J&J short earlier this year – they were very efficient and friendly. Many thanks.

We need to vaccinate again and will certainly go back there (if available). The people were friendly and efficient, and a very courteous chap led us oldies to make sure we could use the lift!

Thank you for your care for the wider community.
